Review lecture	
Minimal Total Discomfort; an integrating framework for food intake and selection	13-20
J. Michael Forbes, Institute of Integrative and Comparative Biology, University of Leeds, Leeds LS2 9JT, UK.	
Hormonal control of food intake	21-27
Thomas A. Lutz, Institute of Veterinary Physiology, Vetsuisse Faculty University of Zurich, Winterthurerstrasse 260; and Zurich Center for Integrative Human Physiology, University of Zurich; 8057 Zurich, Switzerland	
Amino acids and nitrogen	
1. Dietary arginine supplementation of primiparous sows during early gestation increases litter size and alters fetal muscle fiber development	28
J. Bérard, J-Y. Deru and G. Bee – Posieux	
2. Optimum threonine : lysine ratio in diets for growing pigs: An evaluation of literature data	29
Britta Blank and A. Susenbeth – Kiel	
3. The impact of dietary Leucine oversupply at marginal levels of Valine on animal performance, blood metabolites, and catabolic key enzymes in weaned pigs	30
M. K. Wiltafsky and F. X. Roth – Freising-Weihenstephan	
4. Chicken studies to improve procedure and database for evaluation of the optimal dietary amino acid ratio	31
Jaqueline Farke, C. Wecke and F. Liebert – Göttingen	
5. Investigations on amino acid supply in diets for young stallions and effects of lysine supplementation on growth and selected blood parameters	32
D. Koslowski and F. Liebert – Göttingen	
6. Influence of maternal low and high protein diets during pregnancy in young sows on glucose metabolism of their offspring	33
Solvig Görs, Iris S. Lang, P. Junghans, U. Hennig, B. Stabenow, F. Schneider, W. Otten, Charlotte Rehfeldt and Cornelia C. Metges – Dummerstorf	
7. High protein diet fed during pregnancy and lactation affects maternal body mass, blood parameters and litter performance in mice	34
Marzena Kucia, Martina Langhammer, Solvig Görs, Elke Albrecht, M. Derno, G. Nürnberg and Cornelia C. Metges – Dummerstorf	
8. Investigations on muscle development (M. extensor digitorum communis) depending on lysine supply in diets for young stallions	35
D. Koslowski, F. Liebert and J. Thielebein – Göttingen/Halle (Saale)	

9.	Preference of broiler chickens for various methionine supply in low protein diets Brigitte R. Paulicks, P. Prechtel, A. Lemme and Barbara M. Böhmer – Freising-Weihenstephan/Hanau	36
10.	Response of Ross 708 to enhanced balanced protein supply fed in subsequent phases O. Akinde and A. Lemme – Hanau	37
11.	Use of the automatised method of Dumas (VARIO MAX CNS®) for routine analysis of crude protein content in feed (concentrates) as well as in samples of ileal chyme of pigs in comparison to the established Kjeldahl method Anne Mößeler, Sonka Zantz, Katja Krause, Simone Möbus, P. Rust and J. Kamphues – Hannover	38

Minerals and trace elements

12.	Effects of zeolite A on rumen fermentation and phosphorus metabolism in dairy cows Hilde Grabherr, M. Spolders, P. Lebzien, L. Hüther, G. Flachowsky and M. Fürll – Braunschweig/Leipzig	39
13.	Effect of various feed iodine supplementations, rapeseed meal in the ration and the iodine species on iodine status and -excretion of dairy cows K. Franke, U. Meyer, H. Wagner, H. O. Hoppen and G. Flachowsky – Braunschweig/Kulmbach/Hannover	40
14.	Influence of roughage/concentrate ratio on the effect of urinary acidifiers in ponies is independent of dietary Ca/P ratio Ellen Kienzle, L. Berchtold and N. Zorn – München	41
15.	Chromium yeast supplementation on postprandial glucose and insulin profiles in insulin-resistant ponys Ingrid Vervuert, Barbara Oßwald and M. Coenen – Leipzig	42
16.	Effects of potassium dependent variation in dietary cation balance on acid base and nitrogen balance in pigs Susann Engelking and M. Coenen – Leipzig	43
17.	Low phosphorus and normal calcium intake results in extremely bowed legs in growing dogs which are reversible by phosphorus repletion Britta Dobenecker and Ellen Kienzle – München	44
18.	Effect of dietary rare earth elements (REE) on growth performance of fattening bulls Annett Schwabe, U. Meyer and G. Flachowsky – Braunschweig	45
19.	Activity of selenium dependent GPx1 and GPx3 in growing male lambs fed different levels of Se J. Fischer, Erika Most and J. Pallauf – Giessen	46
20.	Effects of high dietary iodine supply as iodide or iodate on mRNA expression of marker genes associated to fat metabolism and oxidative stress in abdominal fat tissue of fattening pigs K. Schedle, V. Wagner, Q. Li, T. Ertle and W. Windisch – Wien	47

21. **Investigations on content and distribution of iodine in freshwater fish after supplementation of maximum iodine content in fish feed: a field study** 48
Sylvia von Rosenberg, Stefanie Daub and W. A. Rambeck – München
22. **Impact of rapeseed cake supplementation and staggered feed iodine concentrations on the iodine content of hen eggs** 49
Anna S. Röttger, Ingrid Halle, H. Wagner, Inka Niehoff, G. Flachowsky – Braunschweig/Kulmbach
23. **Influence of two different selenium sources on growth of broiler chickens** 50
Ingrid Halle and H. Schenkel – Braunschweig/Stuttgart-Hohenheim

Energetics

24. **Differences in energy expenditure, physical activity and feeding behaviour between grazing cows and cows fed grass indoors** 51
Luzia D. Kaufmann, A. Münger, M. Rérat, P. Junghans, Solvig Görs, Cornelia C. Metges, Frigga Dohme – Posieux/Dummerstorf
25. **Metabolic adaptations and hepatic gluconeogenesis in response to chronic intravenous glucose infusions in midlactating dairy cows** 52
B. Al-Trad, Kerstin Reisberg, T. Wittek, A. Alkaassem, G. Gäbel, M. Fürll and J. R. Aschenbach – Leipzig
26. **Collectively regulated liver enzymes in periparturient and feed restricted dairy cows** 53
B. Kuhla, D. Albrecht, K. Duske, A.-K. Langhof, H. M. Hammon, S. Kuhla and Cornelia C. Metges – Dummerstorf/Greifswald
27. **Effects of limited concentrate feeding on growth and blood and serum variables in dairy calves** 54
J. D. Lohakare, H. van de Sand, K. Gerlach, M. Pries, M. Mielenz, H. Sauerwein and K.-H. Südekum – Bonn/Kleve/Münster
28. **Effects of colostrum versus formula feeding on postprandial hepatic glucose metabolism in neonatal calves** 55
Julia Steinhoff, R. M. Bruckmaier and H. M. Hammon – Dummerstorf/Bern
29. **Milk yield and body condition loss in early lactation in a dairy and a dual purpose cow breed** 56
Dagmar Schaub, Karen Aulrich and Kerstin Barth – Trenthorst
30. **Intestinal glucose absorption and hepatic glucose metabolism in goat kids fed casein- or soy protein-based milk diets** 57
Ulrike Schönhusen, Anne Flöter, Julia Steinhoff, S. Kuhla, K. Huber, P. Junghans, H. M. Hammon and Cornelia C. Metges – Dummerstorf/Hannover
31. **Activity of hepatic but not skeletal muscle carnitine palmitoyltransferase enzyme is depressed by intravenous glucose infusions in lactating dairy cows** 58
B. Al-Trad, Kerstin Reisberg, G. Gäbel, T. Wittek, M. Fürll and J. R. Aschenbach – Leipzig

32. **Endocrine changes and postprandial hepatic glucose metabolism in preterm and term born calves** 59
 Julia Steinhoff, R. M. Bruckmaier and H. M. Hammon –
 Dummerstorf/Bern

Undesired materials

33. **Investigations in order to establish a concept for using dioxin exposed floodplains by beef cattle under food safety aspects** 60
 Venja Taube, Katrin Gude, Elke Bruns-Weller and J. Kamphues –
 Hannover/Oldenburg
34. **Secondary metabolites of *A. fumigatus* in grass and maize silages** 61
 J. Ostertag, J. Bauer, H. Spiekers, W. Richter and K. Meyer – Freising-
 Weihenstephan/Grub
35. **Bioavailability of the *Fusarium* toxin deoxynivalenol (DON) from contaminated wheat straw and chaff in comparison with its grain** 62
 D. Rohweder, Hana Valenta, S. Sondermann, M. Schollenberger,
 W. Drochner and S. Dänicke – Braunschweig/Stuttgart-Hohenheim
36. **Effects of deoxynivalenol (DON) on lipopolysaccharide (LPS) stimulated and unstimulated primary porcine hepatocytes** 63
 Susanne Döll, J. Schrickx, S. Dänicke and Johanna Fink-Gremmels –
 Braunschweig/Utrecht
37. **Effects of Deoxynivalenol (DON) and its derivative DON-sulfonate (DONS) on porcine peripheral mononuclear cells (PMNC)** 64
 S. Dänicke, Tanja Goyarts, Hana Valenta, Marita Beyer and
 H.-U. Humpf – Braunschweig/Münster
38. **Investigations to minimise dioxin contamination in lamb/mutton production when using exposed river banks by grazing sheep** 65
 Katrin Gude, Venja Taube, Elke Bruns-Weller and J. Kamphues –
 Hannover/Oldenburg
39. **Studies on the accumulation of arsenic in animal tissues after long-time arsenic supplementation in ewes** 66
 Ricarda Krüger, Jeanette Boguhn, J. Breuer and M. Rodehutschord –
 Halle (Saale)/Stuttgart-Hohenheim
40. **Mycotoxin screening in healthy cows and cows with abomasal displacement** 67
 A. Alkaassem, S. Dänicke and M. Fürll – Leipzig/Braunschweig

Digestion

41. **Comparative investigations on food comminution in herbivores – faecal particle size and influence of lactation** 68
 Eva Schenk, Kerstin Erlinghagen, J. Hummel and K.-H. Südekum – Bonn
42. **Do individual protozoal species differ in their effect on the digestion of sheep?** 69
 Johanna O. Zeitz, S. L. Amelchanka, T. Michałowski, K. Wereszka,
 M. Kreuzer and Carla R. Soliva – Zürich/Jablonna

43. **Effect of potassium and insulin on the activity of abomasal smooth muscles in vitro and on the flow rate of digesta in the duodenum of dairy cows** 70
Gesche Tuerck, Margit Ziegler, J. Rehage, P. Lebzien und Sabine Leonhard-Marek – Hannover/Braunschweig
44. **Validation of a novel technique for the measurement of the chewing activity in horses** 71
Annette Zeyner, S. Quellmalz, Josefine Dill and O. Lengwenat – Rostock/Leipzig/Osnabrück/Hannover
45. **Investigations on a shred whole acorns (*Quercus pubescens*) based diet on the paroid gland in piglets** 72
M. G. Cappai, P. Wolf, V. Grosse Liesner, A. Kastner, G. Nieddu, W. Pinna and J. Kamphues – Sassari/Hannover
46. **Investigations on particle sizes in different compartments of the digestive tract of ostriches (*Struthio camelus*)** 73
Julia Fritz, M. Clauss and Ellen Kienzle – München/Zürich
47. **Effect of the level of concentrate in *Fusarium*-toxin contaminated rations on ruminal fermentation in dairy cows** 74
B. Hildebrand, Jeanette Boguhn, S. Dänicke, P. Lebzien and M. Rodehutsord – Stuttgart-Hohenheim/Braunschweig
48. **Influence of forage source and feed particle size of rations for ruminants on the abundance of classical ruminal bacterial species *in vitro*** 75
Maren Witzig, Jeanette Boguhn and M. Rodehutsord – Halle (Saale)/Stuttgart-Hohenheim
49. **Effects of replacing conventional concentrate ingredients by tomato pomace and olive cake on digestibility and milk yield of Awassi (fat-tailed) sheep** 76
Souheila Abbeddou, S. Rihawi, L. Iñiguez, Barbara Rischkowsky, H. D. Hess and M. Kreuzer – Zürich/Aleppo (Syrien)
50. **Acid-base status in rumen fluid and urine of dairy Holstein cows - a comparative study** 77
J. Kricziokat, T. Wittek and M. Fürll – Leipzig
51. **Investigations on cast production, energy and nutrient supply as well as protein requirement in birds of prey (eagle owl, common bussard, kestrel falcon)** 78
Petra Wolf, Meike Lüdtko and J. Kamphues – Hannover

Lipids and fatty acids

52. **Comparison of extruded and raw linseed on their effects on ruminal biohydrogenation of linolenic acid, fibre digestibility and milk fatty acid profile in dairy cows** 79
Frigga Dohme and G. Bee – Posieux
53. **Whey Protein Emulsion Gel Composite of Soybean and Linseed Oils to increase poly-unsaturated fatty acids in cow' milk** 80
A. M. van Vuuren, P. G. van Wikselaar, J. W. van Riel, A. Klop and J. A. H. P. Bastiaans – Lelystad/Zwolle

54.	Does a supplementation of conjugated linoleic acids during early lactation affect milk and milk component yields beyond the cessation of supplementation?	81
	Katrin Metzger-Petersen, M. Pries, H. van de Sand and K.-H. Südekum – Bonn/Münster/Kleve	
55.	Short-term effects of fish oil or soybean oil supplementation to a starchy meal on postprandial glucose and insulin responses in healthy horses	82
	Ingrid Vervuert, Sara Klein and M. Coenen – Leipzig	
56.	Lack of influence of n-3 polyunsaturated fatty acids in parturition feed on sow and piglet performance	83
	A. Cools, D. Maes, K. Goris, D. Bogaerts and G. P. J. Janssens – Ghent	
57.	Investigations on the role of peroxisome proliferator-activated receptor (PPAR) α in the metabolic adaptations during lactation	84
	K. Eder, Anke Gutgesell, Eileen Schmidt, Corinna Brandsch, Gabriele I. Stangl, F. Hirche and R. Ringseis – Halle (Saale)	
58.	A dietary conjugated linoleic acid mixture downregulates fatty acid transporters in the mammary gland of lactating rats	85
	R. Ringseis, Anke Gutgesell and K. Eder – Halle (Saale)	
59.	Effects on fatty acid composition of milk fat due to dietary rumen-protected conjugated linoleic acid during early lactation of cows	86
	T. Liermann, P. Möckel, G. Jahreis, Angelika-Maria Pfeiffer and F. J. Schwarz – Freising-Weihenstephan/Jena/Berlin	
60.	Comparison of emulsifying methods for linoleic acid and their influence on <i>in vitro</i> ruminal biohydrogenation and fermentation characteristics	87
	Ratchaneewan Khiaosa-Ard, F. Leiber, M. Kreuzer and Carla R. Soliva – Zurich	
61.	Involvement of TNFα in adipocyte metabolism and the interaction with liver metabolism in dairy cows	88
	H. Anette van Dorland, H. Sadri, Isabelle Morel and R.M. Bruckmaier – Bern/Isfahan/Posieux	
62.	Comparative aspects of mRNA-expression in bovine fat tissue	89
	L. Zapfè, L. Locher, N. Klötting, M. Kern, M. Blüher and M. Fürll – Leipzig	
63.	Enrichment of RAW264.7 macrophages with essential 18-carbon fatty acids affects both oxidative burst and production of immune modulatory cytokines	90
	Julia Schumann, B. Walloschke and H. Fuhrmann – Leipzig	
64.	Selenate and CLA isomers added to a diet modify the fatty acid concentration in the liver and femoral muscles of rats	91
	Marian Czauderna, J. Kowalczyk, K. M. Niedźwiedzka, L. Leng and K. Cobanova – Jabłonna/Kosice	
65.	Selenized yeast and CLA isomers added to a diet modify the fatty acid concentration in the liver and femoral muscles of rats	92
	Marian Czauderna, J. Kowalczyk, K. M. Niedźwiedzka, L. Leng and K. Cobanova – Jabłonna/Kosice	

Other nutriments, active ingredients and additives

66. **Influence of a probiotic *E. faecium* strain on lactic acid bacteria species in the intestine of piglets** 93
W. Vahjen, Irina Klär and O. Simon – Berlin
67. **Effect of probiotics and prebiotics on intestinal morphology and mRNA expression of inflammatory marker genes in selected tissue samples of newly weaned piglets** 94
Christiane Mair, C. Plitzner, M. W. Pfaffl and W. Windisch – Wien/
Freising-Weihenstephan
68. **Effect of *Enterococcus faecium* on the intestinal immune system of piglets during a challenge infection with *Salmonella Typhimurium* DT104** 95
Lydia Scharek-Tedin, H. Mafamane, I. Szabó, K. Nöckler, K. Tedin and
M. F. G. Schmidt – Berlin
69. **Effects of a niacin supplementation to different diets on rumen fermentation, amounts of niacin at the duodenum, and its concentration in blood and milk of dairy cows** 96
Inka-Donata Niehoff, Wiebke Bigalke, Liane Hüther, S. Dänicke and P.
Lebzien – Braunschweig
70. **Effect of a folic acid supplementation on ruminal metabolism in dairy cows** 97
Veronika Ragaller, Liane Hüther, P. Lebzien and G. Flachowsky –
Braunschweig
71. **Methane reduction effect of simple phenolic acids evaluated by *in vitro* Hohenheim gas production method** 98
A. Jayanegara, H. P. S. Makkar and K. Becker – Stuttgart-Hohenheim
72. **Investigations on the water intake of growing heifers** 99
M. Grabow, U. Meyer, Hj. Abel and G. Flachowsky – Braunschweig/
Göttingen
73. **Evaluation of Lacticin 3147 to reduce *in vitro* ruminal methane production** 100
A. Jayanegara, H. P. S. Makkar and K. Becker – Stuttgart-Hohenheim
74. **Effect of a pantothenic acid supplementation on ruminal metabolism in dairy cows** 101
Veronika Ragaller, Liane Hüther, P. Lebzien and G. Flachowsky –
Braunschweig
75. **Comparison between the *in vivo* and *in vitro* formation of vitamin K₂ by the canine intestinal microbiota** 102
Susan Kröger, Petra Hellweg, K. Schäfer and J. Zentek – Berlin
76. **Effect of Dietary Nucleotide Supplementation on Gastrointestinal Functions and Ileal Digestibilities of Nutrients in Newly Weaned Piglets** 103
Nadja Sauer, R. Mosenthin, Meike Eklund, Dagmar Jezierny and Eva
Bauer – Stuttgart-Hohenheim
77. **Influence of the feed additives digestarom[®] and Bolifor[®] on gut parameters in growing chicken** 104
C. Wecke, Agata Lecewicz, Angela Sünder and F. Liebert – Göttingen/
Olsztyn

78.	Effect of mannanoligosaccharides and fructooligosaccharides on bone mineral content and bone resistance of broiler chickens fed diets with high content of dietary fibres	105
	Birgit Prause, Ruth Messikommer and C. Wenk – Zürich	
79.	Bone stability and bone composition in pigs fed low P diets supplemented with benzoic acid and phytase	106
	Kathrin Bühler, Annette Liesegang, B. Bucher and C. Wenk – Zurich	
80.	Immune modulating influence of <i>Echinacea purpurea</i> on lysozyme content of egg white and immune response of cell lines	107
	Barbara M. Böhmer, Kathrin Huber and Brigitte R. Paulicks – Freising-Weihenstephan/Zurich	
81.	Reduction of the prevalence of digestive disorders in the postweaning period of rabbits by a herbal feed additive	108
	J. Zentek, R. Krieg, W. Vahjen, Wageha Awad and Susan Kröger – Berlin/Niederwünsch	
82.	Ammonium-iron-hexa-cyanoferrate in feed for wild boars can reduce caesium contamination	109
	Ellen Kienzle, Katja Meinel, J. Reddemann, P. Morfeld – München/Feldkirchen/Dortmund	

Feed estimation and feed

83.	Effects of long-term feeding of genetically modified maize (Bt-maize; MON810) to dairy cows on performance and metabolic parameters	110
	Kerstin Steinke, V. Paul, P. Gürtler, W. Preißinger, Steffi Wiedemann, Christiane Albrecht, H. Spiekers, H. H. D. Meyer and F. J. Schwarz – Freising-Weihenstephan/Grub/Bern	
84.	Investigations on the potential transfer of recombinant DNA and Cry1Ab protein from feed into milk, blood, feces and urine of cows fed genetically modified maize	111
	P. Gürtler, V. Paul, Kerstin Steinke, W. Preißinger, Steffi Wiedemann, Christiane Albrecht, H. Spiekers, F.J. Schwarz and H.H.D. Meyer – Freising-Weihenstephan/Grub/Bern	
85.	Transfer of volatiles into the milk of cows fed on silage containing microencapsulated lemon oil	112
	Cornelia Hartl, F. J. Schwarz and P. Schieberle – Garching/Freising-Weihenstephan	
86.	Effect of cattle stocking density on the browsing intensity on individual young tree and shrub species present in a subtropical mountain forest of Southern Bolivia	113
	Svenja Marquardt, S. Beck, A. Marquez, M. Kreuzer, Andrea C. Mayer and H. Alzérreca – Zurich/Tarija/La Paz (Bolivia)	
87.	Effect of 24-hours-grazing versus daytime-grazing on feed intake and growth of sheep in the steppe of Inner Mongolia, China	114
	Katrin Müller, L. Lin, C. Wang, T. Glindemann, Anne Schiborra, P. Schönbach, H. Wan, B. M. Tas, M. Gierus, F. Taube and A. Susenbeth – Kiel	

88.	Ensiling moistly harvested lupine seeds and the influence of conservation on oligosaccharides	115
	Annett Gefrom, Edda Maria Ott and Annette Zeyner – Rostock	
89.	Effects of diets' physical form (mash/pellets; particle sizes) on morphological and histological parameters of the gastrointestinal tract in weaned piglets	116
	Saara Betscher, A. Beineke and J. Kamphues – Hannover	
90.	Egg production and egg composition in budgerigars: A basis for factorial derivation of energy and nutrient requirements during laying period	117
	A.-C. Häbich, A. Irle, S. Theermann, S. Hansen, E. Özeler and J. Kamphues – Hannover	
91.	Effects of hay versus concentrate on urinary energy excretion in horses	118
	Ellen Kienzle, Lisa Berchtold and Annette Zeyner – München/Rostock	
92.	Energy protein metabolism and fertility in three cattle breeds in Tyrol	119
	M Füll, N. Göttler, Ch. Mader, J. Gottschalk and A. Einspanier – Leipzig	
93.	Validation of energy requirements for fattening cattle in Germany based on extensive data from feeding trials	120
	L. Gruber, F. J. Schwarz, U. Meyer, K. Rutzmoser, T. Guggenberger – Irdning/Freising-Weihenstephan/Braunschweig/Poing	
94.	Influence of different amounts of soybean meal on the isoflavone content in dairy cow's milk	121
	M. Hünerberg, U. Meyer, D. R. Kammerer, R. Carle, G. Flachowsky – Braunschweig/Stuttgart-Hohenheim	
95.	Effect of plant species rich in secondary metabolites on milk yield, milk composition and body condition of dairy cows	122
	Tasja Kälber, M. Kreuzer, H.-R. Wettstein and F. Leiber – Zurich	
96.	Ruminal crude protein degradability of different concentrates	123
	A Kilic, A. Metwally, Friederike Zeller, M. Schuster and F. J. Schwarz – Izmir/Freising-Weihenstephan/Grub	
97.	Influence of genotype on chemical composition and ruminal degradability in maize residual plant matter of varying stages of maturity	124
	Friederike Zeller, J. Danier and F. J. Schwarz – Freising-Weihenstephan	
98.	The effect of CO₂ treatment of maize plants during growth on their <i>in situ</i> dry matter degradability	125
	Hongbiao Ding, P. Lebzien, S. Dänicke, G. Flachowsky, R. Manderscheid and U. Meyer – Beijing/Braunschweig	
99.	<i>In vitro</i> ruminal fermentation of diets containing whole plant buckwheat	126
	S. L. Amelchanka, M. Kreuzer, Carla R. Soliva and F. Leiber – Zurich	
100.	Forage quality and tannin concentration of a Swiss collection of sainfoin (<i>Onobrychis vicifolia</i>) accessions	127
	B. N. Azuhwi, B. Boller, Melanie Martens, Frigga Dohme, M. Kreuzer and H.D. Hess – Posieux/Thun/Zurich	
101.	Digestibility of diets (consisting of supplementary feed and wheat) in fattening turkeys related to wheat treatment (intact, crushed, ground)	128
	Stefanie Bank, L. Koddebusch and J. Kamphues – Hannover/Garrel	

102. **Effects of litter quality and excreta composition (water, uric acid, ammonia, macromineral excess) on the development and severity of foot pad dermatitis in fattening turkeys** 129
I. M. I. Youssef, A. Beineke and J. Kamphues – Hannover
103. **Efficiency of buckwheat kernels as feed component in broiler diets** 130
F. Leiber, Ruth Messikommer, Janina S. Meier and C. Wenk – Zurich
104. **Amino acid digestibility of rapeseed meals in caeectomised laying hens** 131
M. Rezvani, H. Kluth, M. Bulang and M. Rodehutsord – Halle (Saale)/
Stuttgart-Hohenheim

Physiology of transport and epithelial cells

105. **Functional and morphological adaptation of rumen epithelium in sheep fed hay and concentrate** 132
Judith Kuzinski, R. Zitnan, Christina Warnke-Gurgel, Elke Albrecht, Monika Schweigel – Dummerstorf/Kosice/Rostock
106. **New insights for the contribution of ruminal Ca absorption to Ca homeostasis in sheep** 133
Nina Mrochen, Mirja Wilkens and B. Schröder – Hannover
107. **Transepithelial potential differences affect transport of short-chain fatty acids (SCFA) across rumen epithelium** 134
R. Rackwitz, J. R. Aschenbach, Petra Philipp and G. Gäbel – Leipzig
108. **Effects of different carbohydrate sources on intestinal glucose absorption in calves** 135
Stefanie Klinger, B. Noci, Kerstin Müller, Manuela Kuhn, Meike Zurich, G. Breves – Hannover/Berlin
109. **Effects of increasing zinc concentrations on intestinal epithelial barrier properties and viability in two cell culture models** 136
Ulrike Lodemann, H. Martens, R. Einspanier, Angelika Bondzio – Berlin
110. **Functional characterisation of calcium and phosphate transport across the equine intestine** 137
Anja Cehak, F. Geburek, K. Feige, B. Schröder, G. Breves – Hannover
111. **Developmental influences on the expression of MCT1 in the rumen, reticulum and omasum of neonatal calves** 138
F. Taifour, J. Steinhoff, Helga Pfannkuche, H. M. Hammon and G. Gäbel – Leipzig/Dummerstorf
112. **HCO₃⁻ transport in sheep omasum: Effect of SCFA** 139
Driton Caushi, Katharina Wolf, Meike Beisele, H. Martens – Berlin
113. **Heat Shock Proteins are modulating Na transport in sheep rumen** 140
I. Rabbani, U. Tietjen and H. Martens – Berlin

Communications of the Committee for Requirement Standards of the Society of Nutrition Physiology

- New Equations for Predicting Metabolisable Energy of Compound Feeds for Ruminants** 143-146
- List of Authors** 147-156
