Review lecture

- Host-microbiota interactions in the digestive tract** 19
M. Blaut – Nuthetal

Digestion

- 1 Interactions between supplements of monocalcium phosphate and a phytase on the presence of inositol phosphates in the ileum of broilers** 27
Zeller, E., Schollenberger, M., Kühn, I., Rodehutschord, M. – Stuttgart-Hohenheim/Darmstadt
-
- 2 Influence of particle size distribution in the diet and further compaction on the prececal digestibility of starch, crude protein and amino acids in broilers** 28
Sander, S. J., Bormann, T., Kluth, H., Witte, M., Üffing, B., Kamphues, J. - Hanover/Halle-Wittenberg
-
- 3 Influence of soluble and insoluble non-starch-polysaccharides on digesta passage rate in growing layers after infection with nematodes** 29
Lambertz, C., Das, G., Humburg, J., Abel, H., Gauly, M. - Göttingen
-
- 4 Methane emission from camelids: A comparison of measured data with literature data from ruminants** 30
Dittmann M. T., Runge U., Lang R. A., Moser D., Galeffi C., Kreuzer M., Clauss M. - Zurich/Neukirch/Thur/Cochranton/Basel
-
- 5 Effect of different levels of soluble carbohydrates in hay on ruminal fermentation, microbial profile and plasma acute phase protein concentration in dairy cows** 31
Münger, A., Ineichen, S., Zeitz, J. O., Wellnitz, O., Dohme-Meier, F. - Posieux/Zurich/Gießen/Bern
-
- 6 Fermentation profile of particle-associated (PARL) and free rumen fluid (FRL) in dairy cows fed barley-based diets treated with lactic acid and heat** 32
Zebeli, Q., Gschaider, S., Abdel-Raheem, S., Khol-Parisini, A., Gruber, L., Gasteiner, J. - Vienna/Gumpenstein
-
- 7 Processing of barley grain with lactic and tannic acid modulates ruminal fermentation and nutrient degradation in a Rusitec system** 33
Deckardt, K., Zebeli, Q. - Vienna
-
- 8 Effects of a glyphosate-based herbicide on *in vitro* ruminal fermentation and microbial community with special attention to clostridia** 34
Riede, S., Schafft, H., Lahrssen-Wiederholt, M., Breves, G. - Hanover/Berlin
-
- 9 Effects of 25-Hydroxyvitamin D3 in combination with anionic salts on localization and extent of gastrointestinal calcium absorption in dairy cattle** 35
Oehlschlaeger, V., Wilkens, M., Schröder, B., Dänicke, S., Breves, G. - Hanover/Braunschweig
-
- 10 Influence of a *Lawsonia intracellularis* infection on the nutrient digestibility (total tract) and growth rate in vaccinated or not vaccinated young pigs** 36
Mischok, J., Visscher, C. F., Sander, S. J., Peitzmeier, E., Kamphues, J. - Hanover/Hille

114	Impact of thermal and organic acid treatment of feed on apparent absorption and metabolism of minerals and tibia quality in broilers	140
	<i>Hafeez, A., Mader, A., Goodarzi Borojeni, F., Ruhnke, I., Männer, K., Zentek, J. - Berlin</i>	
115	Epigenetic effects of dietary zinc on the expression of ZIP4 in the intestinal epithelium of piglets	141
	<i>Karweina, D., Martin, L., Pieper, R., Zentek, J., Brockmann, G. - Berlin</i>	

116	Zinc oxide effects on T helper cell associated transcription factors and cytokine expression of gut associated lymphatic tissues in weaned piglets	142
	<i>Kreuzer, S., Franken, T., Karweina, D., Pieper, R., Brockmann, G. A. - Berlin</i>	
117	High inorganic selenium and manganese diets for fattening pigs and their influence on nutrient content of <i>M. longissimus dorsi</i>	143
	<i>Schwarz, C., Duller, S., Kandler, W., Wetscherek, W. - Vienna/Tulln</i>	
118	Effect of latent zinc deficiency on fecal digestibility of dry matter and crude protein as well as activity of trypsin and α-amylase in pancreatic homogenates of weaned piglets	144
	<i>Brugger, D., Weiss, K., Windisch, W. - Freising</i>	
Environment		
119	Meat quality of muscles with different function in suckling calves as affected by the inclination of alpine pastures	145
	<i>Gangnat, I. D. M., Kreuzer, M., Dufey, P.-A., Leiber, F., Bérard, J. - Zurich/Posieux/Frick</i>	
120	Effect of pasture management system and grass composition on eating and ruminating behaviour of cattle	146
	<i>Bérard, J., Turille, G. - Zurich/Aosta</i>	
121	Assessment of the ruminal methyl-coenzyme M reductase gene as indicator for methane production from dairy cows	147
	<i>Aguinaga Casañas, M. A., Derno, M., Rangkasenee, N., Metges, C. C., Kuhla, B. - Dummerstorf</i>	
122	Impact of heat stress on dry matter intake and milk yield of mid-lactation dairy cows	148
	<i>Gorniak, T., Meyer, U., Südekum, K.-H., Dänicke, S. - Göttingen/Bonn/Braunschweig</i>	
Undesirable substances		
123	Zearalenone (ZEN) and deoxynivalenol (DON) contaminated maize in dairy cow feeding: Effects on performance and toxin transfer to plasma	149
	<i>Winkler, J., Kersten, S., Meyer, U., Engelhardt, U., Dänicke, S. - Braunschweig</i>	
124	Transfer of dioxins and polychlorinated biphenyls from contaminated grass pellets prepared from grass collected from a river flood plain into selected fatty tissues of growing sheep	150
	<i>Stark, M. L., Hoogenboom, R., Lüth, A., Schafft, H., Spolders, M., Zentek, J., Gehling, M., Lahrssen-Wiederholt, M. - Berlin/Wageningen</i>	
125	Residues of deoxynivalenol (DON) and its metabolite de-epoxy-DON in eggs, plasma and bile of laying hens of different genetic background	151
	<i>Ebrahim, M., Kersten, S., Valenta, H., Dänicke, S. - Braunschweig</i>	

Fatty acids		
126	Effect of exocrine pancreatic insufficiency (EPI) on fatty acid composition of fat tissue - study on pancreatic duct ligated pigs used as a model for human with EPI <i>Möbeler, A., Gregory, P. C., Hoffmann, K., Kamphues, J. - Hanover</i>	152
127	Enrichment and effects of conjugated linoleic acids and structurally related fatty acids in ovine rumen epithelium <i>Masur, F., Benesch, F., Fuhrmann, H., Gäbel, G. - Leipzig</i>	153
128	Conjugated linoleic acids (CLA) and structurally similar fatty acids in ovine ruminal epithelial cells - Effects on MCT1 and MCT4 <i>Benesch, F., Masur, F., Fuhrmann, H., Gäbel, G. - Leipzig</i>	154
129	Lycopene, selenium compounds and fish oil added to the ration influence the concentration of fatty acids and oxidative stress in chicken thigh muscles <i>Czauderna, M., Rozbicka-Wieczorek, A., Więsyk, E., Brzóska, F., Kowalczyk, J., Śliwiński, B., – Jabłonna/Krakau</i>	155
Workshop – What can feedingstuffs perform? Potentials and physiological limits		
WS1	Newer aspects in the evaluation of straight feedingstuffs <i>H. Schenkel, Universität Hohenheim, Landesanstalt für Landwirtschaftliche Chemie, Stuttgart-Hohenheim</i>	158
WS2	Feed additives in animal nutrition: promises and physiological limits <i>W. Windisch, Technische Universität München, Lehrstuhl für Tierernährung am Wissenschaftszentrum Weihenstephan, Freising</i>	159
WS3	Feedstuffs intended for “particular nutritional purposes” vs. feeding measures with regard on dietetics <i>J. Kamphues, Institute of Animal Nutrition, University of Veterinary Medicine Hanover – Foundation, Hanover</i>	161
WS4	Legal status for straight feedingstuffs <i>S. Kruse, Bundesministerium für Ernährung und Landwirtschaft (BMEL), Bonn</i>	163
	Communications of the Committee for Requirement Standards of the Society of Nutrition Physiology	165
